Summary:

Second-year Software Engineering student with a passion for software development and solving technological challenges. Fast learner with hands-on experience in academic and personal software projects. Seeking to deepen my knowledge in Full-Stack development and gain practical experience in professional environments.

Education:

B.Sc. in Software Engineering, Braude College (88.5) (2023 - Present)

- Specialization in Full-Stack Development, Data Structures and Algorithms, and Database Management.

Practical Software Engineering – Ort Bialik College (94.5) (2018 - 2020)

- Extensive knowledge in Python, Java, and C development, SQL, and data structures.

Work Experience:

Braude College – Data Structures and C Language Assignment Reviewer (Part-time) (January 2025 - Present)

- Reviewed assignments covering advanced topics in C and data structures, including linked lists, stacks, queues, and trees.
- Conducted code evaluations based on academic guidelines, optimized algorithm performance, and collaborated closely with the teaching staff.
- Provided detailed feedback on dozens of exercises weekly, focusing on code structure, algorithm efficiency, and adherence to software development standards.

Max (Credit Card Company) (Full-time) (April 2023 – January 2024)

- Managed over 50 customer service and sales calls per day, resolving technical and financial issues to improve customer satisfaction.

Skills:

- **Programming Languages:** Python, Java, C, C++, JavaScript
- **Frontend:** HTML, CSS, React
- **Databases:** SQL, MySQL
- **Concepts:** OOP, Data Structures, Algorithms, Debugging
- **Tools:** Git, GitHub, Windows, Linux
- **Soft Skills:**
 - Experience working in dynamic team environments, including collaborative development in academic projects and military service.
 - Excellent communication skills, including providing technical feedback (as an assignment reviewer) and leading team training (in military service).
 - Fast self-learner, experienced in acquiring and implementing new technologies in independent projects.
 - Strong problem-solving abilities, including advanced debugging in software development.

Military Service:

Radar Technician, 611th Battalion Communication Division (June 2020 – February 2023)

- Successfully completed a specialized radar technician course for engineers, focusing on identifying and repairing communication system malfunctions.
- Operated and maintained advanced radar systems in an operational artillery battalion, troubleshooting and repairing critical issues in field conditions.

Achievements:

- Selected as the Northern Command's Outstanding Soldier in the Communications Corps for high professionalism, leadership, and technical training of the unit.
- Led professional training for 10+ new soldiers in the unit, developing training materials and conducting hands-on field exercises.

Certifications:

- Dean's List Award for Academic Excellence in Software Engineering
- Practical Software Engineering Diploma with Honors

Languages:

- Hebrew – Native Language
- English – Full Professional Proficiency (speaking, reading, writing)
