Summary:

High-achieving Software Engineering student (GPA 86.7) and Dean's List recipient with a strong foundation in Full-Stack development, algorithms, and system architecture. Experienced in code review and performance optimization. Military background as an Outstanding Soldier in a technical communications unit, demonstrating high-level troubleshooting and leadership skills.

Education:

B.Sc. in Software Engineering | Braude College | 2023 - 2027 (Expected)

- **GPA: 86.7 | Award:** Dean's List for Academic Excellence
- Specialization in Full-Stack Development, Data Structure, Algorithms and Database Management.

Practical Software Engineering (Handessai) | Ort Bialik College | 2018 - 2020

- **GPA: 94.5 | Award:** Practical Software Engineering Diploma with Honors
- Extensive knowledge in Python, Java, and C development, SQL, and data structures.

Skills:

- **Programming Languages:** Python, Java, C, C++, C#, JavaScript, SQL
- **Backend & DB:** MySQL, Client-Server Architecture, Database Design.
- **Frontend:** HTML, CSS, React
- **Core Concepts:** OOP, Data Structures, Algorithms, Operating Systems, Debugging
- **Tools:** Git, GitHub, Windows, Linux
- **Soft Skills:** Teamwork, technical communication, rapid self-learning, and complex problem-solving.

Projects:

Restaurant Management System | Java, MySQL, Client-Server

- Developed a full-scale desktop application for restaurant operations, including reservation management, real-time waitlists, and table tracking.
- Implemented a Client-Server architecture with a central MySQL database to ensure data consistency across multiple stations.
- Designed a user-friendly GUI focusing on operational efficiency and multi-user role management.

Image Steganography Application | Java

- Built an application for hiding and extracting encrypted messages within image files (Steganography).
- Integrated Asymmetric Encryption (Public/Private Key) to secure messages before embedding, ensuring end-to-end data confidentiality.
- Implemented bit-manipulation algorithms to ensure message integrity while maintaining image quality.

Work Experience:

Academic Assignment Reviewer | Braude College | January 2025 - Present (Part-time)

- Review and grade advanced C and Data Structures assignments (Linked Lists, Trees, Stacks, Queues).
- Perform manual code reviews, identifying logic errors and optimizing student code for better time and space complexity.
- Provide detailed technical feedback to dozens of students weekly, enforcing industry-standard coding conventions.

Customer Service and Sales Representative | MAX (Credit Card Co.) | April 2023 - January 2024 (Full-time)

- Resolved technical and financial issues in a fast-paced environment, consistently exceeding performance targets.

Military Service:

Radar Technician | IDF - 611th Battalion Communications Division | June 2020 - February 2023 (Full-time)

- **Honors:** Selected as the **Northern Command's Outstanding Soldier** in the Communications Corps for technical excellence and leadership.
- Maintained and repaired advanced communication in radar systems under high-pressure operational conditions.
- Led professional training for 10+ new soldiers, developing training materials and conducting field exercises.

Languages:

- Hebrew - Native Language
- English - Full Professional Proficiency (speaking, reading, writing)
